

September 20, 2021

Good morning, Ashland Elementary School Families,

Today, we learned of a confirmed positive case of COVID-19 for a member of the AES community. Our well wishes are extended to this individual and their family. This individual has not been at school since the first days of September; therefore, there are no concerns for school-based exposures and no need for further communication from the school.

Thank you to our families for your ongoing efforts to check for symptoms of COVID-19 and keeping your children home even with the mildest of symptoms. If your child is symptomatic, please contact Mrs. Rubbe, School Nurse. ***Be well, AES!***

Respectfully,
Mary Moriarty
Superintendent of Schools
